

Do-All Outdoors FULL COCK TRAP HEAD

Trap Head Assembly

- 1 Insert 1 3/4" bolt into hexagon shaped opening, in the trap head carriage through the top of the pivot mount assembly; interlocking the gear mesh teeth. Secure with 1/2" nut using wrench.

- 2 Insert/slide the universal clip into the extruded channel on the throwing arm. Make sure the open end of the clip points towards the pointed end of the arm.
**The sliding universal clip allows for speed and direction change. You can place any size target under this clip as singles, stacked doubles or nested pairs.

- 3 Hook the black main spring into the silver swiveling spring hook, which is attached at the throwing arm pivot point.

- 4 At the opposite end of the black main spring, attach the 3/8" spade bolt. Pull the threaded end of the spade bolt through the hole at the back of the trap head carriage. Secure main spring and spade bolt with 3/8" washer and 3/8" nylock nut. Use wrench provided to tighten black main spring until 8 threads of the spade bolt are showing.

- 5 ****Specifically made for the Wobbler Kit Accessory:**
Insert rubber handle into the end of the trap head carriage.

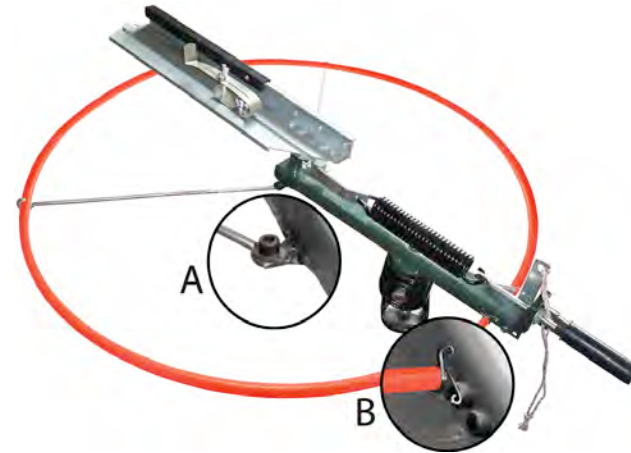

Do-All Outdoors FULL COCK TRAP HEAD

6 To attach safety ring guard, attach the ring brace arms using small hex bolts (A).

Pinch arms of the spring holders (B) and slide them over ends of ring guard. Push ends of ring guard over posts on trap head and slide spring holder down over guard and post to secure.

Secure with brace arms so ring guard will show the path of the throwing arm.

Item Description	Qty
